

# SOLUTIONS BEYOND THE OBVIOUS

## *Accounting Services*

## Accounting Services

At Tronconi Segarra & Associates, we work with our clients to gain a thorough understanding of their business goals and objectives, management philosophy and surrounding business environment. This enables us to proactively develop key solutions providing enhanced value to their businesses well beyond the traditional bookkeeping, attest and related services.

Our value-added services supplement management capabilities, strengthen financial systems and controls, promote stakeholder understanding and interpret and apply changing rules and regulations impacting your business. Constant improvement is a goal we help clients strive for by including recommendations on how to improve business efficiencies and management effectiveness. We also work with clients to control and monitor business and financial risks and ensure clients have adequate information to plan for success. When our clients confidently use the information and tailored solutions we provide to them in running their businesses, and they begin to achieve their goals, we are inspired to do even more for them to help insure their continued success.

Examples of accounting value-added services that we provide include:

- Evaluate, design and implement accounting and reporting systems
- Perform cost-benefit or other special financial analysis
- Assist in the development of internal periodic financial reporting packages
- Assist in the implementation of new technical standards
- Evaluate compliance with management policies and procedures
- Assist in improving operating efficiency and effectiveness

Of course, we do assist clients who require traditional bookkeeping, attest and related services. Descriptions and benefits of these services may be found on our Bookkeeping/General Ledger information sheet and our various Audit Services information sheets.
